SOTT

SOTT * WATERBOMB High Pressure Sprayer

- a must-have for any installer who wants to work quickly and efficiently

The SOTT WATERBOMB is the ULTIMATE high-pressure sprayer and is for every window film and PPF installer. No more messing around with small pressure sprayers that waste time needing to be re-inflated all the time.

The WATERBOMB can be pumped up to 6 bar with a hand pump or with a compressor giving you perfect pressure to spray the moisture on to your film or surface for the whole of your working day.

The barometer indicates how much pressure you have left in your tank. The inner casing is made of coated steel which will not rust and is not sensitive to chemicals and acids. The SOAK'EM trigger is compact and easy to handle which makes it easy to use in small spaces. The special ultra-flexible hose is reinforced on the inside so that kinking, flattening or being run over is not a problem.

Storage compartment

Special storage compartment for small loose parts.

Extra large filling opening

Quick filling is easy with the large filling opening.

Heavy duty pump

Very strong brass pump with heavy duty metal handle.

2 adjustable straps

The two adjustable straps give you the option of carrying the tank on your back.

Compressor connection

Awesome! Pump up in the morning and all day sufficient pressure!

SOAK 'EM nozzle

The SOAK'EM trigger made of durable plastic. The pressure can be regulated via the nozzle. The trigger is also lockable.

Integrated pressure gauge

Quickly and easily read the tank pressure on the built-in pressure gauge.

Rotatable connection

Unique: the connection between the nozzle and hose can be rotated without the hose rotating.

Blow-off/safety valve

Just press the button and all pressure is off the tank.

Flexible heavy-duty hose

This flexible soft hose of no less than 8,3m, is internally reinforced and can withstand a pressure of 15 bar.

Large foot + extra stability

The large foot stand ensures that the Water Bomb does not easily fall over during use.

Bottom connection

Because the hose connection is at the bottom, no residual liquid remains in the tank and again, it will not easily fall over.
