

DIGIT 150 CLING White Gloss

Product Information

Monomeric, electrostatic PVC Film (white gloss, 150 μ) laminated on an one-sided clay-pasteboard liner (180 g/m²).

The PVC offers a high dimensional stability.

Especially designed for short-term window decoration.

Designed to be highly resistant to solvent ink aggression during printing process and to guarantee very good printing performance on any solvent and eco-solvent based ink-jet printer.

Shelf Life

2 years when stored in the original packaging between 20° C and 25° C at 50% relative humidity.

Safety Data Sheet

When used under normal conditions, this product does not generate or release any dangerous substances or hazardous chemicals. This is a non-hazardous product in accordance with the current GefStoffV and EU criteria. Therefore it is not necessary to prepare a Material Safety Data Sheet for this product. The Safety Data Sheet serves only to comply with the regulation to supply information in accordance with REACH Regulation (EC) No. 1907/2006 and is available on request. This product is not a hazardous product with regards to transportation legislation; neither does it contain substances that are hazardous to water within the meaning of the federal water act. After use, dispose of the waste product in accordance with the local / national authorities.

Technical Data

Carrier: Monomeric, electrostatic PVC,

(cling-film)

Thickness: $150 \,\mu$ +/- $5 \,\%$

Adhesive: ./.

Adhesion: ./.

Liner: one-sided clay-pasteboard

 $(180 \, \text{g/m}^2)$

Application temperature: +10 - +40 °C

Temperature durability: - 40 - +80 °C

Outdoor durability: 6 month

(unprinted film)

Standard Dimensions

1000 mm x 50 m 1370 mm x 50 m
